

Koch Capabilities, LLC (FKA Koch Business Solutions, LP) seeks an Analytics Engagement Leader.

Job Description:

- Serve as an ambassador to identify and lead efforts for application of advanced analytics applications and technology.
- Build relationships with senior leaders to gain an understanding of their strategic needs that can be met using advanced analytics.
- Build client value case proposals to identify and quantify opportunities.
- Perform current state analysis to develop enterprise-wide solutions for complex business problems.
- Work with clients to develop an analytics roadmap that aligns with an organization's strategic initiatives.
- Partner with customers to deliver presentations/ workshops that identify new value creation opportunities.
- Serve as primary client engagement leader on all phases of the analytics project from ideation, business case development, prioritization, experimentation, and deployment, appropriately managing client expectations throughout the project.
- Lead an active cross-functional group of customers, project/resource managers, scientists, data engineers, application developers, and analysts to deliver desired outcomes.
- Serve as a 'product owner' for new applications.

Minimum Requirements:

Employer requires a Bachelor's degree in Industrial & Systems Engineering, Computer Science, Business Administration or a related field and 3 years of experience in consulting and/or presales for advanced analytics projects or software. In lieu of a Bachelor's degree, employer will accept an additional 2 years of experience in consulting and/or presales for advanced analytics projects or software.

Of the required experience, must have:

- 3 years of experience with broad business problem-solving using advanced analytics such as Machine Learning, Operations Research, Supply Chain Software, etc.
- 3 years of experience creating and delivering presentations to executive-level clients, and communicating analytics concepts to non-technical audiences;
- 3 years of experience working in the data/analytics vendor landscape;
- 3 years of experience with financial engineering/analysis skills to build business cases and track value; and
- 2 years of experience leading a project or large work-stream.

Up to 25% domestic and international travel required.

100% telecommuting permitted.
